

Sprint Report #1
Looking For Slugs
Team Name
10/24/23

Actions to stop doing:

- Changing our technology stack.
 - We've changed our technology stack a decent amount of times. It's likely permanent now, but it's better to 100% stick to something now so we can learn the technologies on our own time, since it's likely new to most of us.
- Changing the scope of our project too vastly.
 - We've changed the overall scope of our project every now and then. Starting as a mobile app, then a web app. We've also changed our minimum viable product fairly vastly.

Actions to start doing:

- Meet up more often.
 - We should be meeting up more often to discuss progress and any new plans.
- Have people work on the project independently more often.
 - Most of the time we've worked on the project has been in our meetings. We've worked on the project independently occasionally, however, we should more often.

Actions to keep doing:

- Keep communicating
 - In addition to daily scrum meetings, giving updates through discord also was very helpful

Work completed/Not completed:

- Completed:
 - Firebase setup
 - Registration/Login functionality
 - Application Prototyping via Figma
- Not completed:
 - Front end integration didn't make it as far as we'd hoped

Work Completion rate:

- total number of user stories completed during the prior sprint:
 - As a user, I want to have an identity on the application.
 - As a user, I want to be able to login in from the home page
